

Adding JAR Files

To add the functionality provided by this library to one of your projects, simply do the following:

1. Start Eclipse, and locate the project folder to which this ACM library should be added.
2. Right-click this class folder, and select "Properties"
3. Select "Java Build Path" on the left, and then the "Libraries" tab. Now, click the "Add External JARS..." button
4. Locate and select the "acm.jar" file you just downloaded, and then click "Open" Finally, click "OK" to close the dialog box. You will know that everything went ok if, when you open your project folder, you see an item called "Referenced Libraries", and upon expanding this item, you see the package "acm.jar" listed.
